

Meeting minutes – CCCM Cluster – Typhoon Yolanda Emergency Response

Date: 16/11/2013

Present:

IOM: Grant Robertshaw, Jerel Tabong, Eva Eugenio

WHO : Ma An Pestano

Save The Children: Willian Azucena

Canada DART: Adrian Storm

ACF: Charlotte Schneider

The meeting was chaired by Grant Robertshaw

A brief overview was given explaining that IOM has identified 5 active Evacuation Centers in the Capiz province and that DTM forms have been submitted for each one.

Additionally it was noted that IOM and DART had jointly conducted a medical clinic at the Dulangan elementary school in Pilar that day with 60 patients processed.

Results of the activity were discussed with the lower than expected incidence of diarrhea noted (10% of the patients). It was agreed by those that have visited the EC's that this center had the best and cleanest toilet facilities and that centers in Pontevedra would be expected to have a much higher incidence when clinics are conducted there due to much poorer sanitation facilities. Skin conditions and lacerations requiring tetanus injections were noted as the most commonly diagnosed conditions.

It was then discussed that Iloilo had emerged as a high priority with not all of the Evacuation Centers there having been assessed as yet. ACF had visited 2 centers in Iloilo being Estancia and San Dionisio. It was agreed that draft DTM forms be completed for these sites based on ACF information. It was also agreed to coordinate any visits to Evac centers and feed as much information as possible back to IOM.

Discussion was then based on the various clusters with contributors in relation to camp management identified as follows;

- Child friendly facilities – Save the Children
- Food – it was agreed that this was an urgent gap area at present with government supplies running low. ACF were identified as contributors but need for WFP involvement was noted.
- Water – UNICEF/ ACF
- Health – IOM / DART – it was noted here that an escalation protocol was needed for cases that could not be handled by the local teams. As examples, the Pilar clinic found one patient with possible breast cancer and another with a large lump on top of her skull.
- Shelter – Save the Children/ Red Cross
- Hygiene – WASH

It was agreed to continue coordination in relation to the above matters.

The meeting was closed.
