

## **Typhoon Haiyan – Tacloban Co-ordination Hub**

Shelter Cluster and CCCM Cluster Meeting  
24 Nov 2013, 13:00

### Agenda

1. Introductions
2. DSWD updates
  - Information about DWSW distributions still being collected.
  - DSWD has deployed more staff for site management.
  - Request to map other needs of IDPs
  - There is a need for more complete information from humanitarian agencies about distribution. Action all agencies will ensure 3Ws information is inputted
  - Shelter cluster to coordinate IM and 3WS in DWSW
3. Coordination role and structure
  - Shelter cluster coordination structure and focal points updates – please see link
  - <https://www.sheltercluster.org/Asia/Philippines/Typhoon%20Haiyan%202013/Documents/131123%20Shelter%20Cluster%20Philippines%20Hub%20Overview.pdf>
  - Lead: DSWD , focal Point: Ms Pauline Liza C Nahua CCCM Co lead: Coordination: Cluster Coordinator in manila Brad Mellicker ([BMELICKER@iom.int](mailto:BMELICKER@iom.int)) CCCM Tacloban Hub Cluster Coordinator: Jean-Philippe Antolin [JANTOLIN@iom.int](mailto:JANTOLIN@iom.int)
4. Other updates  
Shelter
  - Assessments –MIRA data and initial analysis shared. The REACH which is in depth shelter assessment will start next day or so, and provide update daily on municipalities as these are completed and the assessment will be complete in 2 weeks. Details to follow about distribution of report.
  - Data on needs from DRMIC (Govt data collection) did not fit experience of some agencies on the ground. Action Chose Tacloban and another municipality and drill down to unpick this.
  - Pipeline for emergency shelter materials. SC facing funding challenges . World Vision has mixed concerns about supply but not resources. Plan have materials in their pipeline, Solidarities have more kit coming. CRS possibly not seeing a need to order more. Overall the supply pipeline is long and distributions will not happen for some time but there was not a report of overall funding and supply concern. However this needs to be quantified to check and triangulate
  - A TWIG on transitional shelter will be set up
  - Shelter Technical guidance is prepared and available on shelter cluster.org website
  - The bulk material pipeline for more durable solutions, specifically CGI sheets and coco lumber cycling is in the view of the shelter cluster unlikely to meet demands for recovery.
  - Agencies all reported that they will not bring anymore tents as these no longer the most relevant response.
- CCCM
  - DTM The Displacement Tracking Matrix (see attached) is being updated with new sites added as they are discovered or referred to the DTM team. 15,666 IDPs in 43 sites so far, 18 are located in schools, 67% have a management structure that will be

strengthened in the coming days, most common type of shelter are rooms or classrooms (not tents or makeshift shelter), 16 sites report never or only having received once food distribution. 44% of sites have off-site water access. Only 35 sites report having latrines, 77% have solid waste problems, 82% report having access to health referral systems, 74% report no child friendly spaces. DTM spreadsheets, report and maps will be available tomorrow afternoon at OSOCC and DSWD desks in Grand Stand

#### Facilitation of return Survey

- A representative sample of 2133 heads of households were surveyed throughout IDP sites. Analysis is ongoing but preliminary results indicate: 66 to 97% intend to return to their home, priority items for repair are Fixing Kits, hand tools except for people from the San Jose area. Full report will be available tomorrow afternoon at the OSOCC and DSWD desks in Grand Stand

#### Relocation sites

- A working group is developing this item looking into developing the following strategy prior to adopting the relocation strategy: identify and define no dwelling areas based on existing geo hazards maps, identify the needs and priorities of IDPs to repair their homes and match it with assistance packages, consolidation of sites with IDPs that have no rapid solution improving living conditions.

#### 5. Strategy

- Flash appeal revision process, the new strategic response plan (SRP) will be underway next week and shelter cluster will develop objectives and indicators.
- Cash coordination cash transfers need to be aligned with Govt policy which is now to give a 1 day's min wage (260/day)
- CCCM is developing their approach to facilitate return based on tailored shelter and repair solutions combined with early recovery activities and offering dignified living conditions in collective centres (IDP sites)
- Shelter cluster wishes to see a start of a move towards support to transitional sheltering options
- Early recovery – will work with mayor's office

#### 6. Meetings -

- Schedule has been moved to every 2 days.
- May not be necessary to have meetings twice per week as depends upon TWIGs. Action formalise TWIGS and agree meeting schedule

### **TWIGs (Working Groups)**

#### **CCCM**

##### DTM working group

Looking at expanding the reach of DTM in Leyte and Samar  
DTM being rolled out in Palo Municipality. Interested partners that want to get involved can coordinate with Joana Dabao ([JDABAO@iom.int](mailto:JDABAO@iom.int)) to observe DTM in progress.

##### Facilitation of Return

Early Recovery, Shelter and CCCM cluster members working together to devise the approach.

Interested members can when in OSOCC come to CCCM desk to see the see the analysis of the Facilitation of Return Survey. Working group meeting time tbc at next cluster meeting.
