

Assessment Report

Nov 26,2013

Municipality: **Sagay**

Interviewed: Agriculturist, Cenro, DSWD, Health, Planning officer, Engineering,

Interviewer: Christy Marfil and Redentor Atanacio

Profile (site information)

- Province: Negros Occidental
- Population: 150,400 individuals
- No of household: 27,390
- Total no of affected family: 16,684
- No of barangay: 25 (all affected)
- No of casualty: None
- No of missing: None
- No of Injury: 7

Shelter

- No of totally damaged houses: 3,508
- No of partially damaged houses:13,182
- Debris clearing is ongoing for the barangay level. Major streets are accessible by car, jeep, motorbikes.
- Lumbers and other construction materials like CGI, Nipa shingles, nails are available. The LGUs are regulating the price of construction supplies.

- 5 Coastal Barangays need assistance in repairing their houses.

Evacuation Center

- No of EC: None (people went home to their make shift houses using salvaged materials; others live with their relatives)

Electricity: Out of 25 Barangays only 3 have partial electricity and the rest have no supply. Repair of posts are on the way. Few have generators.

Communication

- Mode of communication: Cellular phones, Radio in some areas, Television & Internet in some parts of the city with partially lighted areas. (Globe and Smart communication have connection while PLDT is still fixing the lines)

Water supply is abundant through pipelines, hand pump, well and borehole.

Food Security

- Food ration were done by DSWD, LGU, private sectors, school and church based organizations.
- Minimal increase in food prices in the market.

Sanitization

- The affected population still use the toilets in their homes.

Health

- Common health problem: cough, cold, URI & fever.
- 7 cases of wound/laceration, minor injuries.
- Partially damaged hospital (1) and health center (2) as of today's partial report.
- All health facilities are operational.

Livelihood

- Fishing communities were badly damaged especially in the small islands. They need to repair the boat and fish pens/ cages
- Livestock: especially the sheep industry was affected. Need to repair shelters of the sheep, cattle and poultries.
- Fruit bearing trees were also affected.
- Rice ready for harvesting were damaged.
- Tourist areas like resorts were affected (need to repair damaged facilities)

Education

- All school classes have resumed.
- Partially damaged building/classroom (48 school for both elementary and high school)

Priority Needs:

Shelter materials for repair and rebuilding tools.

Livelihood assistance for fishing communities.

Note:

Pre-emptive evacuations were done before the typhoon Yolanda. Faith-based groups and local NGOs are generally providing food and clothing to the displaced groups. UN Habitat visited this area for assessment last week but no assistance provided so far.
